Index of Subjects

Adipose tissue
Modifications induced by dietary lipid source in adipose tissue phospholipid fatty acids and their consequences in lipid mobilization
82, 319, 1999

β-Adrenergic response
Involvement of lipoic acid in plasma metabolites, hepatic oxygen consumption, and metabolic response to a β-agonist in broiler chickens
82, 497, 1999

Amino acids
Ileal amino acid digestibilities in pigs of barley-based diets with inclusion of lucerne (*Medicago sativa*), white clover (*Trifolium repens*), red clover (*Trifolium pratense*) or perennial ryegrass (*Lolium perenne*)
82, 139, 1999

Effect of diet composition and ration size on key enzyme activities of glycolysis–gluconeogenesis, the pentose phosphate pathway and amino acid metabolism in liver of gilthead sea bream (*Sparus aurata*)
82, 223, 1999

Aminopyrine
Dietary restriction of energy and sugar results in a reduction in human cytochrome P450 2E1 activity
82, 257, 1999

Anthropometry
Anthropometric measurement error and the assessment of nutritional status
82, 165, 1999

Antioxidant enzymes
Effects of dietary fats (fish, olive and high-oleic-acid sunflower oils) on lipid composition and antioxidant enzymes in rat liver
82, 233, 1999

Apolipoproteins
Blood cholesterol and apolipoprotein B levels in relation to intakes of animal and plant proteins in US adults
82, 193, 1999

Appetite
Effects of red pepper on appetite and energy intake
82, 115, 1999

Aspartame
Blood glucose and meal patterns in time-blinded males, after aspartame, carbohydrate, and fat consumption, in relation to sweetness perception
82, 437, 1999

Atherosclerosis
Modulation of the regression of atherosclerosis in the hamster by dietary lipids: comparison of coconut oil and olive oil
82, 401, 1999

Bifidobacteria
Effects of inulin on faecal bifidobacteria in human subjects
82, 375, 1999

Bioavailability
Wholewheat flour ensures higher mineral absorption and bioavailability than white wheat flour in rats (Short communication)
82, 17, 1999

Influence of feeding different vegetables on plasma levels of carotenoids, folate and vitamin C. Effect of disruption of the vegetable matrix
82, 203, 1999

Biochemical markers
The effect of moderately and severely restricted dietary magnesium intakes on bone composition and bone metabolism in the rat
82, 63, 1999

No effect of copper supplementation on biochemical markers of bone metabolism in healthy adults
82, 283, 1999

Blood cholesterol
Blood cholesterol and apolipoprotein B levels in relation to intakes of animal and plant proteins in US adults
82, 193, 1999

Blood lipids
Effects of inulin on faecal bifidobacteria in human subjects
82, 375, 1999

Blood pressure
Time-course of the change in blood pressure level in magnesium-deficient Wistar rats
82, 243, 1999

BMI
Relation of BMI to a dual-energy X-ray absorptiometry measure of fatness
82, 49, 1999

Dietary and socio-economic factors associated with obesity among Kuwaiti college men
82, 369, 1999

Body composition
Relation of BMI to a dual-energy X-ray absorptiometry measure of fatness
82, 49, 1999

The control of partitioning between protein and fat during human starvation: its internal determinants and biological significance
82, 339, 1999

Bone
The effect of moderately and severely restricted dietary magnesium intakes on bone composition and bone metabolism in the rat
82, 63, 1999

No effect of copper supplementation on biochemical markers of bone metabolism in healthy adults
82, 283, 1999

Wheat bran supplementation does not affect biochemical markers of bone turnover in young adult women with recommended calcium intake (Short communication)
82, 431, 1999

Book reviews
The Nutrition of the Rabbit
82, 77, 1999

Response in the Yield of Milk Constituents to the Intake of Nutrients by Dairy Cows
82, 77, 1999

Encyclopedia of Human Nutrition
82, 159, 1999

Oral Health. Diet and Other Factors. Report of the British Nutrition Foundation Task Force, 1998
82, 331, 1999

Modern Nutrition in Health and Disease
82, 331, 1999

Breast milk
Fatty acid composition of white adipose tissue and breast milk of Mauritian and French mothers and erythrocyte phospholipids of their full-term breast-fed infants
82, 263, 1999

Neutral oligosaccharide content of preterm human milk
82, 361, 1999

Lactose-derived oligosaccharides in the milk of elephants: comparison with human milk
82, 391, 1999

Butyrate
Enhancement of butyrate production in the rat caecocolonic tract by long-term ingestion of resistant potato starch
82, 419, 1999

Cachexia
The control of partitioning between protein and fat during human starvation: its internal determinants and biological significance
82, 339, 1999

Caffeine
Inverse association between coffee drinking and serum uric acid concentrations in middle-aged Japanese males
82, 125, 1999

Calcium
Wheat bran supplementation does not affect biochemical markers of bone turnover in young adult women with recommended calcium intake (Short communication)
82, 431, 1999

Carbohydrate
Carbohydrate intake improves cognitive performance of stress-prone individuals under controllable laboratory stress
82, 457, 1999

Cardiovascular function
Time-course of the change in blood pressure level in magnesium-deficient Wistar rats
82, 243, 1999

Carotenoids
Influence of feeding different vegetables on plasma levels of carotenoids, folate and vitamin C. Effect of disruption of the vegetable matrix
82, 203, 1999

Spreads enriched with plant sterols, either esterified 4,4-dimethylsterols or free 4-desmethylsterols, and plasma total- and LDL-cholesterol concentrations
82, 273, 1999

Modulation of human T-lymphocyte functions by the consumption of carotenoid-rich vegetables
82, 383, 1999

Chinese men
Quantitative significance of measuring trimethylselenonium in urine for assessing chronically high intakes of selenium in human subjects
82, 291, 1999

Chlorzoxazone
Dietary restriction of energy and sugar results in a reduction in human cytochrome P450 2E1 activity
82, 257, 1999

Coconut oil
Effects of dietary coconut oil on fatty acid oxidation capacity of the liver, the heart and skeletal muscles in the preruminant calf
82, 299, 1999

Modulation of the regression of atherosclerosis in the hamster by dietary lipids: comparison of coconut oil and olive oil
82, 401, 1999

Phospholipid fatty acid composition and protein kinase C activity in the large intestine of rats fed on butter and coconut-oil diets
82, 411, 1999

Coffee
Inverse association between coffee drinking and serum uric acid concentrations in middle-aged Japanese males
82, 125, 1999

Cognitive performance
Carbohydrate intake improves cognitive performance of stress-prone individuals under controllable laboratory stress
82, 457, 1999

Cohort study
Are the advantages of the Mediterranean diet transferable to other populations? A cohort study in Melbourne, Australia
82, 57, 1999

Colonic fermentation
Enhancement of butyrate production in the rat caecocolonic tract by long-term ingestion of resistant potato starch
82, 419, 1999

Conjugated linoleic acid
Effects of conjugated linoleic acid (CLA) isomers on lipid levels and peroxisome proliferation in the hamster
82, 309, 1999

Copper
No effect of copper supplementation on biochemical markers of bone metabolism in healthy adults
82, 283, 1999

Cows' milk
Double-blind study of the addition of high-protein soya milk *v.* cows' milk to the diet of patients with severe hypercholesterolaemia and resistance to or intolerance of statins
82, 91, 1999

Cytochrome P450
Dietary restriction of energy and sugar results in a reduction in human cytochrome P450 2E1 activity
82, 257, 1999

Cytokines
Modulation of human T-lymphocyte functions by the consumption of carotenoid-rich vegetables
82, 383, 1999

Dietary fat
Effects of dietary coconut oil on fatty acid oxidation capacity of the liver, the heart and skeletal muscles in the preruminant calf
82, 299, 1999

Modulation of the regression of atherosclerosis in the hamster by dietary lipids: comparison of coconut oil and olive oil
82, 401, 1999

Dietary fatty acids
Relationships between fatty acid status of sow plasma and that of umbilical cord, plasma and tissues of newborn piglets when sows were fed on diets containing tuna oil or soyabean oil in late pregnancy
82, 213, 1999

Dietary fibre
Ileal amino acid digestibilities in pigs of barley-based diets with inclusion of lucerne (*Medicago sativa*), white clover (*Trifolium repens*), red clover (*Trifolium pratense*) or perennial ryegrass (*Lolium perenne*)
82, 139, 1999

Dietary intake assessment
A comparison of methods of assessment of dietary selenium intakes in Otago, New Zealand
82, 131, 1999

Dietary patterns
Patterns of energy intake in patients with cirrhosis and healthy volunteers
82, 41, 1999

Dietary protein
Blood cholesterol and apolipoprotein B levels in relation to intakes of animal and plant proteins in US adults
82, 193, 1999

Docosahexaenoic acid
Effects of dietary *n*-3 polyunsaturated fatty acids from plant and marine origin on platelet aggregation in healthy elderly subjects
82, 183, 1999

Dual-energy X-ray absorptiometry
Relation of BMI to a dual-energy X-ray absorptiometry measure of fatness
82, 49, 1999

Eicosapentaenoic acid
Effects of dietary *n*-3 polyunsaturated fatty acids from plant and marine origin on platelet aggregation in healthy elderly subjects
82, 183, 1999

Elderly
Micronutrients: highlights and research challenges from the 1994–5 National Diet and Nutrition Survey of people aged 65 years and over
82, 7, 1999

Are the advantages of the Mediterranean diet transferable to other populations? A cohort study in Melbourne, Australia
82, 57, 1999

Elephant milk
Lactose-derived oligosaccharides in the milk of elephants: comparison with human milk
82, 391, 1999

Energy intake
Patterns of energy intake in patients with cirrhosis and healthy volunteers
82, 41, 1999

Effects of red pepper on appetite and energy intake
82, 115, 1999

Energy metabolism
The control of partitioning between protein and fat during human starvation: its internal determinants and biological significance
82, 339, 1999

Epidemiology
Blood cholesterol and apolipoprotein B levels in relation to intakes of animal and plant proteins in US adults
82, 193, 1999

Ethyl esters
Incorporation and washout of orally administered *n*-3 fatty acid ethyl esters in different plasma lipid fractions
82, 481, 1999

***n*-3 Fatty acids**
Incorporation and washout of orally administered *n*-3 fatty acid ethyl esters in different plasma lipid fractions
82, 481, 1999

Fatty acids
Postprandial lipoprotein, glucose and insulin responses after two consecutive meals containing rapeseed oil, sunflower oil or palm oil with or without glucose at the first meal
82, 97, 1999

Effect of modified dairy fat on fasting and postprandial haemostatic variables in healthy young men
82, 105, 1999

Effects of dietary fats (fish, olive and high-oleic-acid sunflower oils) on lipid composition and antioxidant enzymes in rat liver
82, 233, 1999

Effects of dietary coconut oil on fatty acid oxidation capacity of the liver, the heart and skeletal muscles in the preruminant calf
82, 299, 1999

Modifications induced by dietary lipid source in adipose tissue phospholipid fatty acids and their consequences in lipid mobilization
82, 319, 1999

Fish oil
Olive oil- and fish oil-enriched diets modify plasma lipids and susceptibility of LDL to oxidative modification in free-living male patients with peripheral vascular disease: the Spanish Nutrition Study
82, 31, 1999

Folate
Influence of feeding different vegetables on plasma levels of carotenoids, folate and vitamin C. Effect of disruption of the vegetable matrix
82, 203, 1999

Folic acid
Low-dose folic acid supplementation does not influence plasma methionine concentrations in young non-pregnant women (Short communication)
82, 85, 1999

Food intake
The effects of sucrose and maize oil on subsequent food intake and mood
82, 447, 1999

Food intake regulation
Blood glucose and meal patterns in time-blinded males, after aspartame, carbohydrate, and fat consumption, in relation to sweetness perception
82, 437, 1999

Forages
Ileal amino acid digestibilities in pigs of barley-based diets with inclusion of lucerne (*Medicago sativa*), white clover (*Trifolium repens*), red clover (*Trifolium pratense*) or perennial ryegrass (*Lolium perenne*)
82, 139, 1999

Fructans
The effect of the daily intake of inulin on fasting lipid, insulin and glucose concentrations in middle-aged men and women
82, 23, 1999

Gene probes
The effect of a model melanoidin mixture on faecal bacterial populations *in vitro*
82, 489, 1999

Gluconeogenesis
Effect of diet composition and ration size on key enzyme activities of glycolysis–gluconeogenesis, the pentose phosphate pathway and amino acid metabolism in liver of gilthead sea bream (*Sparus aurata*)
82, 223, 1999

Glucosamine
Ileal amino acid digestibilities in pigs of barley-based diets with inclusion of lucerne (*Medicago sativa*), white clover (*Trifolium repens*), red clover (*Trifolium pratense*) or perennial ryegrass (*Lolium perenne*)
82, 139, 1999

Glucose
Postprandial lipoprotein, glucose and insulin responses after two consecutive meals containing rapeseed oil, sunflower oil or palm oil with or without glucose at the first meal
82, 97, 1999

Glycolysis
Effect of diet composition and ration size on key enzyme activities of glycolysis–gluconeogenesis, the pentose phosphate pathway and amino acid metabolism in liver of gilthead sea bream (*Sparus aurata*)
82, 223, 1999

Green tea
Inverse association between coffee drinking and serum uric acid concentrations in middle-aged Japanese males
82, 125, 1999

Gut fermentation
The effect of a model melanoidin mixture on faecal bacterial populations *in vitro*
82, 489, 1999

Haemostasis
Effect of modified dairy fat on fasting and postprandial haemostatic variables in healthy young men
82, 105, 1999

Homocysteine
Low-dose folic acid supplementation does not influence plasma methionine concentrations in young non-pregnant women (Short communication)
82, 85, 1999

Hunger
Blood glucose and meal patterns in time-blinded males, after aspartame, carbohydrate, and fat consumption, in relation to sweetness perception
82, 437, 1999

Hypercholesterolaemia
Double-blind study of the addition of high-protein soya milk *v.* cows' milk to the diet of patients with severe hypercholesterolaemia and resistance to or intolerance of statins
82, 91, 1999

Imprecision
Anthropometric measurement error and the assessment of nutritional status
82, 165, 1999

Insulin
The effect of the daily intake of inulin on fasting lipid, insulin and glucose concentrations in middle-aged men and women
82, 23, 1999

Intermeal interval
The effects of sucrose and maize oil on subsequent food intake and mood
82, 447, 1999

Inulin
The effect of the daily intake of inulin on fasting lipid, insulin and glucose concentrations in middle-aged men and women
82, 23, 1999

Effects of inulin on faecal bifidobacteria in human subjects
82, 375, 1999

Invited commentaries

Dietary and socio-economic factors associated with obesity among Kuwaiti college men
82, 369, 1999

Lactation
Neutral oligosaccharide content of preterm human milk
82, 361, 1999

Large intestine
Phospholipid fatty acid composition and protein kinase C activity in the large intestine of rats fed on butter and coconut-oil diets
82, 411, 1999

LDL oxidation
Olive oil- and fish oil-enriched diets modify plasma lipids and susceptibility of LDL to oxidative modification in free-living male patients with peripheral vascular disease: the Spanish Nutrition Study
82, 31, 1999

α-Linolenic acid
Effects of dietary *n*-3 polyunsaturated fatty acids from plant and marine origin on platelet aggregation in healthy elderly subjects
82, 183, 1999

Lipids
Spreads enriched with plant sterols, either esterified 4,4-dimethylsterols or free 4-desmethylsterols, and plasma total- and LDL-cholesterol concentrations
82, 273, 1999

Lipoic acid
Involvement of lipoic acid in plasma metabolites, hepatic oxygen consumption, and metabolic response to a β-agonist in broiler chickens
82, 497, 1999

Lipolysis
Modifications induced by dietary lipid source in adipose tissue phospholipid fatty acids and their consequences in lipid mobilization
82, 319, 1999

Lipoproteins
Effects of conjugated linoleic acid (CLA) isomers on lipid levels and peroxisome proliferation in the hamster
82, 309, 1999

Liver
Dietary restriction of energy and sugar results in a reduction in human cytochrome P450 2E1 activity
82, 257, 1999

Liver cirrhosis
Patterns of energy intake in patients with cirrhosis and healthy volunteers
82, 41, 1999

Magnesium
The effect of moderately and severely restricted dietary magnesium intakes on bone composition and bone metabolism in the rat
82, 63, 1999

Time-course of the change in blood pressure level in magnesium-deficient Wistar rats
82, 243, 1999

Maillard reaction
The effect of a model melanoidin mixture on faecal bacterial populations *in vitro*

The effect of palm oil, lard, and puff-pastry margarine on postprandial lipid and hormone responses in normal-weight and obese young women
82, 469, 1999

Oleic acid
Effects of dietary fats (fish, olive and high-oleic-acid sunflower oils) on lipid composition and antioxidant enzymes in rat liver
82, 233, 1999

Oligosaccharides
Neutral oligosaccharide content of preterm human milk
82, 361, 1999

Lactose-derived oligosaccharides in the milk of elephants: comparison with human milk
82, 391, 1999

Olive oil
Olive oil- and fish oil-enriched diets modify plasma lipids and susceptibility of LDL to oxidative modification in free-living male patients with peripheral vascular disease: the Spanish Nutrition Study
82, 31, 1999

Modulation of the regression of atherosclerosis in the hamster by dietary lipids: comparison of coconut oil and olive oil
82, 401, 1999

Peripheral vascular disease
Olive oil- and fish oil-enriched diets modify plasma lipids and susceptibility of LDL to oxidative modification in free-living male patients with peripheral vascular disease: the Spanish Nutrition Study
82, 31, 1999

Peroxisomes
Effects of conjugated linoleic acid (CLA) isomers on lipid levels and peroxisome proliferation in the hamster
82, 309, 1999

Phospholipids
Fatty acid composition of white adipose tissue and breast milk of Mauritian and French mothers and erythrocyte phospholipids of their full-term breast-fed infants
82, 263, 1999

Modifications induced by dietary lipid source in adipose tissue phospholipid fatty acids and their consequences in lipid mobilization
82, 319, 1999

Phospholipid fatty acid composition and protein kinase C activity in the large intestine of rats fed on butter and coconut-oil diets
82, 411, 1999

Plant sterols
Spreads enriched with plant sterols, either esterified 4,4-dimethylsterols or free 4-desmethylsterols, and plasma total- and LDL-cholesterol concentrations
82, 273, 1999

Plasma lipids
Effects of conjugated linoleic acid (CLA) isomers on lipid levels and peroxisome proliferation in the hamster
82, 309, 1999

Incorporation and washout of orally administered *n*-3 fatty acid ethyl esters in different plasma lipid fractions
82, 481, 1999

Plasma metabolites
Involvement of lipoic acid in plasma metabolites, hepatic oxygen consumption, and metabolic response to a β-agonist in broiler chickens
82, 497, 1999

Platelet aggregation
Effects of dietary *n*-3 polyunsaturated fatty acids from plant and marine origin on platelet aggregation in healthy elderly subjects
82, 183, 1999

Postprandial lipaemia
Postprandial lipoprotein, glucose and insulin responses after two consecutive meals containing rapeseed oil, sunflower oil or palm oil with or without glucose at the first meal
82, 97, 1999

Postprandial response
The effect of palm oil, lard, and puff-pastry margarine on postprandial lipid and hormone responses in normal-weight and obese young women
82, 469, 1999

Pregnancy
Relationships between fatty acid status of sow plasma and that of umbilical cord, plasma and tissues of newborn piglets when sows were fed on diets containing tuna oil or soyabean oil in late pregnancy
82, 213, 1999

Preloads
The effects of sucrose and maize oil on subsequent food intake and mood
82, 447, 1999

Preruminant calf
Effects of dietary coconut oil on fatty acid oxidation capacity of the liver, the heart and skeletal muscles in the preruminant calf
82, 299, 1999

Protein kinase C
Phospholipid fatty acid composition and protein kinase C activity in the large intestine of rats fed on butter and coconut-oil diets
82, 411, 1999

Red pepper
Effects of red pepper on appetite and energy intake
82, 115, 1999

Resistant starch
Enhancement of butyrate production in the rat caecocolonic tract by long-term ingestion of resistant potato starch
82, 419, 1999

Retinyl palmitate
Retinyl palmitate supplementation by inhalation of an aerosol improves vitamin A status of preschool children in Gondar (Ethiopia) (Short communication)
82, 179, 1999

RUSITEC
Effect of supplementing a fibre basal diet with different nitrogen forms on ruminal fermentation and microbial growth in an *in vitro* semi-continuous culture system (RUSITEC)
82, 149, 1999

Satiety
Blood glucose and meal patterns in time-blinded males, after aspartame, carbohydrate, and fat consumption, in relation to sweetness perception
82, 437, 1999

Saturated fatty acids
The effect of palm oil, lard, and puff-pastry margarine on postprandial lipid and hormone responses in normal-weight and obese young women
82, 469, 1999

Selenium
A comparison of methods of assessment of dietary selenium intakes in Otago, New Zealand
82, 131, 1999

Quantitative significance of measuring trimethylselenonium in urine for assessing chronically high intakes of selenium in human subjects
82, 291, 1999

Selenium supplementation affects the retention of stable isotopes of selenium in human subjects consuming diets low in selenium (Short communication)
82, 357, 1999

Serum uric acid
Inverse association between coffee drinking and serum uric acid concentrations in middle-aged Japanese males
82, 125, 1999

Short communications
Wholewheat flour ensures higher mineral absorption and bioavailability than white wheat flour in rats
82, 17, 1999
Low-dose folic acid supplementation does not influence plasma methionine concentrations in young non-pregnant women
82, 85, 1999
Retinyl palmitate supplementation by inhalation of an aerosol improves vitamin A status of preschool children in Gondar (Ethiopia)
82, 179, 1999
Selenium supplementation affects the retention of stable isotopes of selenium in human subjects consuming diets low in selenium
82, 357, 1999
Wheat bran supplementation does not affect biochemical markers of bone turnover in young adult women with recommended calcium intake
82, 431, 1999

Soyabean protein
Double-blind study of the addition of high-protein soya milk *v.* cows' milk to the diet of patients with severe hypercholesterolaemia and resistance to or intolerance of statins
82, 91, 1999

Sparus aurata
Effect of diet composition and ration size on key enzyme activities of glycolysis–gluconeogenesis, the pentose phosphate pathway and amino acid metabolism in liver of gilthead sea bream (*Sparus aurata*)
82, 223, 1999

Special review
Review of the journal '*Public Health Nutrition*', first volume 1998
82, 83, 1999

Stable isotopes
Quantitative significance of measuring trimethylselenonium in urine for assessing chronically high intakes of selenium in human subjects
82, 291, 1999
Selenium supplementation affects the retention of stable isotopes of selenium in human subjects consuming diets low in selenium (Short communication)
82, 357, 1999

Stress
Carbohydrate intake improves cognitive performance of stress-prone individuals under controllable laboratory stress
82, 457, 1999

Sympathetic nervous system activity
Effects of red pepper on appetite and energy intake
82, 115, 1999

Tissue fatty acids
Relationships between fatty acid status of sow plasma and that of umbilical cord, plasma and tissues of newborn piglets when sows were fed on diets containing tuna oil or soyabean oil in late pregnancy
82, 213, 1999

T-lymphocytes
Modulation of human T-lymphocyte functions by the consumption of carotenoid-rich vegetables
82, 383, 1999

***Trans* fatty acids**
The effect of palm oil, lard, and puff-pastry margarine on postprandial lipid and hormone responses in normal-weight and obese young women
82, 469, 1999

Triacylglycerol
The effect of the daily intake of inulin on fasting lipid, insulin and glucose concentrations in middle-aged men and women
82, 23, 1999

Urine
Quantitative significance of measuring trimethylselenonium in urine for assessing chronically high intakes of selenium in human subjects
82, 291, 1999

Vegetable consumption
Influence of feeding different vegetables on plasma levels of carotenoids, folate and vitamin C. Effect of disruption of the vegetable matrix
82, 203, 1999
Modulation of human T-lymphocyte functions by the consumption of carotenoid-rich vegetables
82, 383, 1999

Vitamin A
Retinyl palmitate supplementation by inhalation of an aerosol improves vitamin A status of preschool children in Gondar (Ethiopia) (Short communication)
82, 179, 1999

Vitamin B_{12}
Low-dose folic acid supplementation does not influence plasma methionine concentrations in young non-pregnant women (Short communication)
82, 85, 1999

Wheat bran
Wheat bran supplementation does not affect biochemical markers of bone turnover in young adult women with recommended calcium intake (Short communication)
82, 431, 1999

White adipose tissue
Fatty acid composition of white adipose tissue and breast milk of Mauritian and French mothers and erythrocyte phospholipids of their full-term breast-fed infants
82, 263, 1999

Wholewheat flour
Wholewheat flour ensures higher mineral absorption and bioavailability than white wheat flour in rats (Short communication)
82, 17, 1999

Xerophthalmia
Retinyl palmitate supplementation by inhalation of an aerosol improves vitamin A status of preschool children in Gondar (Ethiopia) (Short communication)
82, 179, 1999
